

# Finding a WIG doesn't have to be overwhelming -

## *Tips to securing the perfect wig FOR YOU!*

### 1. Select HAIR TYPE

- ❖ *Human Hair*
  - Provides most natural feel and look
  - Softer hair for more movement and shine
  - More versatile
  - Can change style to your personal taste
- ❖ *Synthetic Hair*
  - Minimal styling, since the synthetic fibers contain a memory component
  - Holds volume with short styles
  - More affordable for short term wearing
- ❖ *Heat Defiant Synthetic*
  - Can use heated styling tools to 350 degrees
  - Allows for styling changes
  - More cost effective than human hair

### 2. Select CAP TYPE

- ❖ *Classic*                      Traditional “weft” rows (crosswise weave)
- ❖ *Monofilament*            Looks more real due to individual hair being placed on a transparent mesh cap
- ❖ *Lace Front*                 Individually tied hairs on very fine lace around the hairline.

### 3. Determine HEAD/WIG SIZE

- ❖ Get measurements of your head by a professional; Wig can be customized to fit perfectly by wig specialist

### 4. Determine Appropriate WIG STYLE

- ❖ Wigs can be most flattering if you pick one that enhances the shape of your face
- ❖ Go to a professional before your hair loss, if you're going through any treatments
- ❖ Wigs can be trimmed and thinned if needed by a stylist

### 5. Determine Correct COLOR

- ❖ Pick a color that is best with your skin tones

### 6. Select ACCESSORIES - Needed for Care of Wigs

- ❖ Wig stand
- ❖ Foam head
- ❖ Shampoo/Conditioner made for wig type
- ❖ Brush/Pic
